Create a new Angular app:

a. In GitBash, change to your `classwork/Unit-7` folder: **cd ~/workspace/classwork/Unit-7-Angular**

b. Generate a new Angular project: **ng new myFirstAngularApp --skip-git**

    If you get the following questions answer them as indicated (ie. **CSS** and **no**)

        ? Which stylesheet format would you like to use? CSS

        ? Do you want to enable Server-Side Rendering (SSR) and Static Site Generation (SSG/Prerendering)? no

c. Change to the Angular project folder: **cd myFirstAngularApp**

d. List the files in the Angular project folder: **ls -a**

e. Run the Angular application: **ng serve** *(or* **ng serve -o** *to open in browser immediately)*

Expected output:

```
Application bundle generation complete. [2.137 seconds]
Watch mode enabled. Watching for file changes...
➜ Local: http://localhost:4200/
➜ press h + enter to show help
```

f. Click on the server URL: **http://localhost:4200/** to run the app in your browser
(not necessary if you issued **ng serve -o** command**)**

g. Go to your browser to see the Angular App page.

h. Stop the server: **ctrl-c** *(it may take a few seconds)*

h. Be sure port used by the server is released: **npx kill-port 4200**

i. Open your Angular Project in VS Code: **code .**

           or open VS code and open the folder **myFirstAngularApp**
